

Configuring Your Listeners Anonymous E-mail for Apple Devices

These are instructions for adding your Listeners Anonymous (LA) e-mail to your iPhone or iPad's Mail app.

1. Open **Settings** → **Mail** → **Accounts** → **Add Account** → **Other** → **Add Mail Account**
2. Enter your e-mail address: *your_Listener_name*@listenersanonymous.com
3. Enter your MXRoute (the company that handles LA emails) password. It was sent to you in an e-mail titled *Your New E-mail*. It is the same message these instructions came in.
4. When your device asks for the incoming mail settings, here is the data you'll need:
 - *Host Name*: witcher.mxrouting.net
 - *Username*: *your_Listener_name*@listenersanonymous.com (your full email address)
 - *Password*: your MXRoute password
 - *Use SSL*: Yes
 - *Port*: 993
 - *Authentication type*: Password
5. When it asks for the outgoing mail settings:
 - *Host Name*: witcher.mxrouting.net
 - *Username*: *your_Listener_name*@listenersanonymous.com
 - *Password*: your MXRoute password
 - *Use SSL*: Yes
 - *Port*: 465
6. When you're done, tap **Save** and your account will appear in your Mail app.

Note: iPhone might ask you to enter your username twice (once for incoming, once for outgoing), and it wants your full email address both times—not just your Listener name.

Write to support@listenersanonymous.com if you hit a snag getting set up.
